

RDS Weigh Bar Systems
provide regular, accurate weighing,
critical to farming profitability

POWERFUL PERFORMANCE TOOLS FOR FARMERS

RDS **ME**

Regular and accurate weighing is an essential part of successful livestock production.

Commonly used for weighing **cattle, sheep, pigs** and **goats**, the RDS Weigh Bar System can also be used for weighing feed mills, for bagging and filling as well as many other weighing uses.

There are many benefits to regularly weighing livestock, all of which lead to the ultimate success and profitability of your business.

BENEFITS

- **Measure growth rates** to protect livestock investment
- Predict and achieve **specific target livestock weights**
- **Plan effectively** for selling livestock and ordering stores
- **Meet customer weight specifications** and avoid costly penalties
- Manage the best **feed solutions** according to regular weighing
- Ensure livestock perform to their expected or necessary **live weight gain** by adjusting feed rations and diet changes
- **Boost animal growth rates**
- **Precise health treatments** by measuring weight to determine accurate doses of veterinary medicines

FEATURES

3 RDS WEIGH BAR SYSTEMS

RDS offer flexibility with a range of three Weigh Bar Systems to suit your individual business requirements.

INTELLIGENT WEIGHING

A key feature of the RDS Weigh Bar System is its ability to precisely measure livestock regardless of the animal's movement. As soon as your livestock step onto the scale the system takes multiple weights in quick succession and intelligently averages these out to create an accurate reading regardless of movement. The process is fast and hassle free saving time and stress for the farmer and animal.

DURABLE

Designed for heavy duty usage built from stainless steel. The electronic cable is protected with a flexible stainless steel cable guard to resist cable damage due to animal biting or accidental pinching, prolonging cable life.

PORTABLE

All systems are quick and easy to set up. Simply lift and fit under any cattle crush.

WARRANTY

12 month parts warranty.

The RDS Weigh Bar range is strong, durable and designed to be fully portable with fast easy set up for complete flexibility.

The RDS Weigh Bar System offers three different products with a range of weight capacities and bar lengths to suit the needs of your farm.
